
Interpretive communication theory and research

Instructor: Carles Roca-Cuberes

E-mail: carles.roca@upf.edu

Course description

This course is an advanced interpretive communication theory and qualitative research methods of media and communication. It presents the most important interpretive theories and qualitative research in the field of communication. It provides students with an advanced understanding of qualitative inquiry in the social sciences, the prospect to learn how to design research that uses qualitative methodology and an opportunity to conduct fieldwork using tools for data collection such as participant observation, interviewing, focus group interviews, qualitative content analysis and discourse analysis. It introduces students to techniques for analysing qualitative data documented in field notes, interview transcripts or media content. Finally, this course aims to familiarise students with the art of writing and presenting qualitative research.

ECTS Credits

4 ECTS

Specific competences

- Obtain knowledge of the interpretive theories of communication and their methodological foundations.
- Acquire the capacity for critical analysis of communication phenomena.
- Be able to apply theoretical and methodological knowledge to qualitative research.
- Be able to design qualitative research in communication.
- Understand the qualitative research process in its different phases.
- Be able to make proposals for qualitative research.
- Acquire general knowledge of qualitative research methods, including: ethnography, interviews, focus groups, content analysis and discourse analysis.
- Understand and practice the writing and presentation of qualitative research.

Learning outcomes

- Acquire an extensive knowledge of interpretive communication theory and qualitative research.
- Know how to place interpretive theory and qualitative research within the broader framework of communication theory and research.
- Critically examine and evaluate interpretive theories and research.
- Be able to put into practice the acquired knowledge in order to plan, design and execute qualitative research.
- Engage actively in discussions on case studies of qualitative theories and research.

Content

1. Introduction to qualitative research: scientific knowledge, social research and the scientific method.
2. The interpretative perspective: symbolic interactionism, the Palo Alto Group, socio-constructionism and ethnomethodology.
3. Theoretical contexts: intercultural communication, rhetorical theory and critical cultural theory.
4. Designing and planning qualitative research: stages and concepts.
5. Qualitative research techniques for researching people: interviews, focus group research, ethnography and virtual ethnography.
6. Qualitative research techniques for researching media content: qualitative content analysis and discourse analysis.
7. Qualitative data analysis.
8. Writing and presenting qualitative research.

Method of presentation

In-class activities:

- Lectures (10 hours)
- Debates and class discussion (5 hours)
- Practical exercises and activities (10 hours)
- Tutorials (5 hours)

Out-of-class activities:

- Personal study & work: (60 hours)

The teaching method includes traditional lectures with case-studies, debates and class discussion from previous readings, and practical activities.

Course assessment

The evaluation includes the following elements:

- Individual assignment: qualitative research proposal (85% of final grade)
- Participation in class discussion (15% of final grade)

Course schedule

Class	Activity
1	T1
2	T2
3	T2 & T3
4	T4
5	T5
6	T5
7	T6
8	T6
9	T7
10	T8
